

THE WORLD OF COFFEE AND MORE

COFFEE SHOP ANALYSIS

Locations and offerings

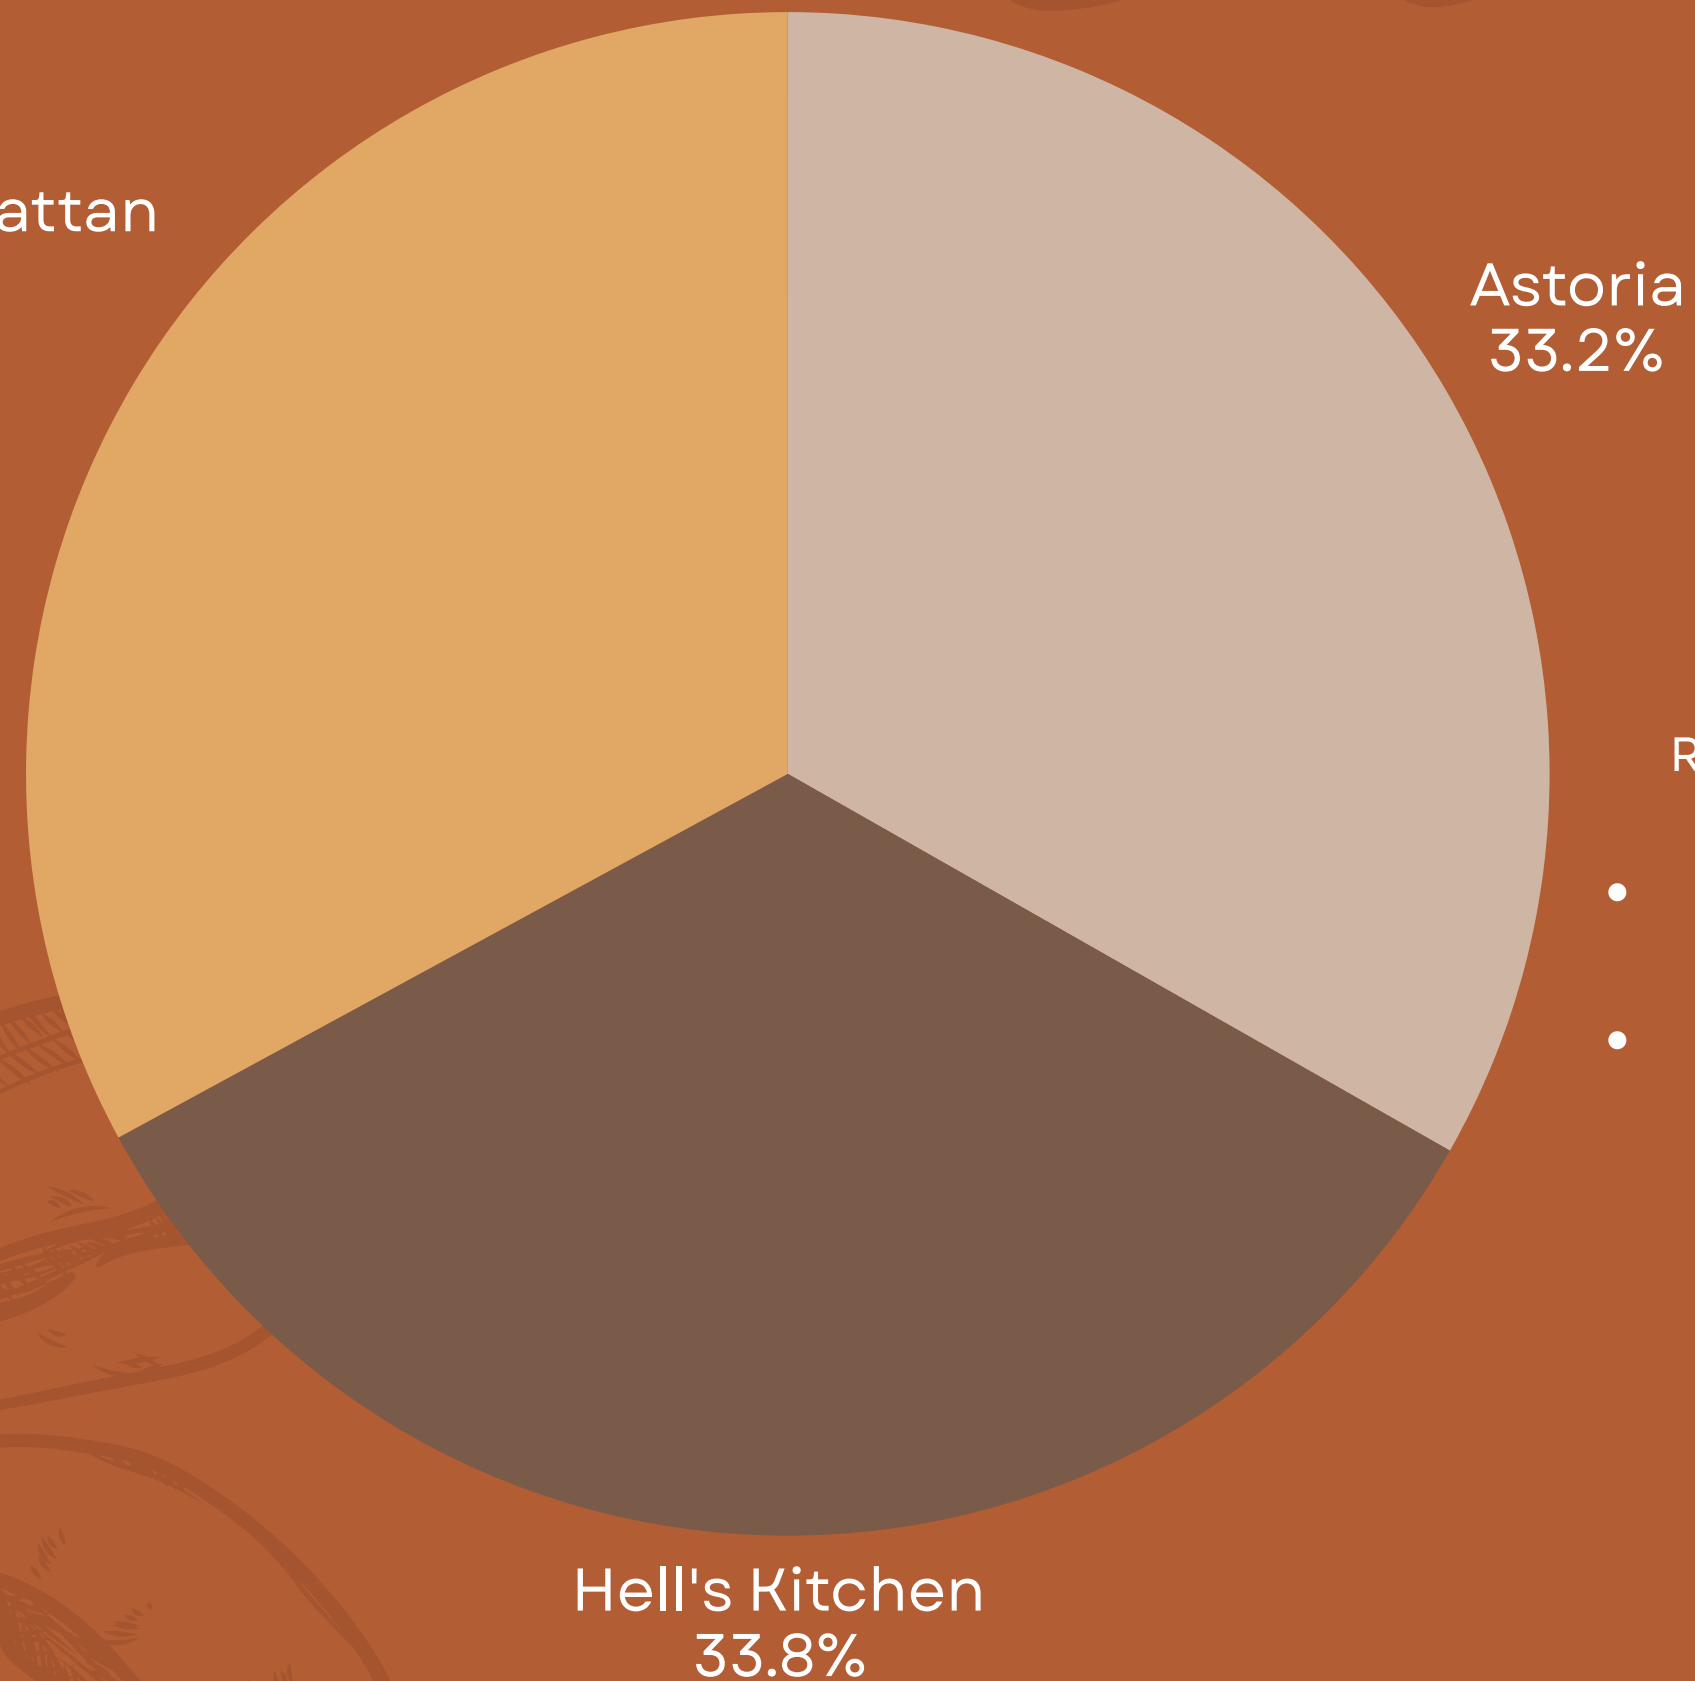

The coffee shops are comprised of three locations: Lower Manhattan, Hell's Kitchen, and Astoria.

The available product categories include:

- Bakery
- Branded
- Coffee
- Coffee Beans
- Drinking Chocolate
- Flavours
- Loose Tea
- Packaged Chocolate
- Tea

Revenue per Location

Revenue Distribution Across Three Locations:

- The revenue is fairly consistent across all three locations.
- Hell's Kitchen generates the highest revenue, contributing **33.8%**, while Lower Manhattan brings in the least, with **32.9%**.

Revenue per Monthly Period

Period of the Month	Sum of REVENUE
BEGINNING OF THE MONTH	31.00%
MIDDLE OF THE MONTH	31.00%
MONTH END	37.00%

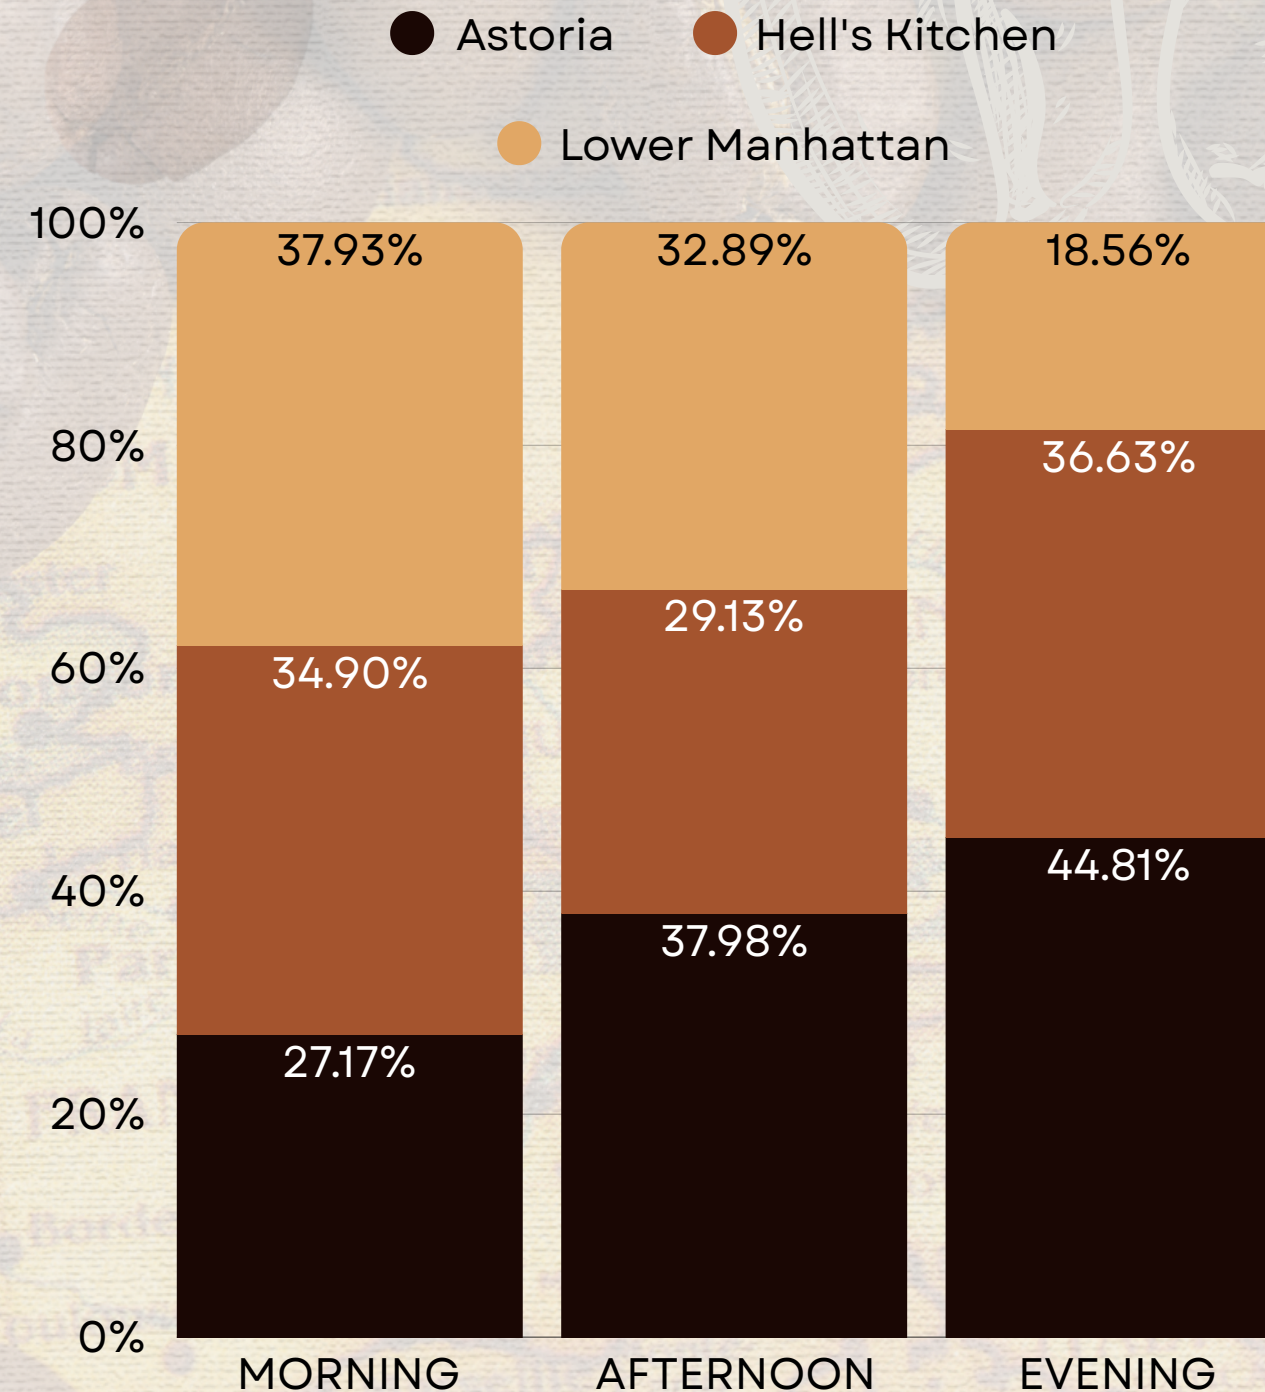

- Most of the Revenue is made up in the end of the month, accounting for 37% of our revenue.
- Perhaps specials/promotions, which will be mentioned in the following slides, can be introduced during the other periods of the month.

Busy Days

DAY_NAME	Astoria	Hell's Kitchen	Lower Manhattan	Grand Total	Percentage	Rank
Mon	33928.29	33389.51	34359.48	R 101677.28	14.55%	1
Fri	33472.75	34743.18	33157.07	R 101373	14.51%	2
Thu	34140.37	33468.06	33159.35	R 100767.78	14.42%	3
Wed	34244.63	33779.09	32289.82	R 100313.54	14.35%	4
Tue	31816.76	34846.47	32792.71	R 99455.94	14.23%	5
Sun	32795.18	33685.63	31849.5	R 98330.31	14.07%	6
Sat	31845.93	32599.23	32449.32	R 96894.48	13.87%	7

- Our busiest days are Mondays and Fridays, generating 30% of the week's revenue.
- Our least busy days are weekends (Sat and Sun), generating just under 28% of the week's revenue.
- Perhaps we may re-asses the trading hours on weekends and/or introduce specials.

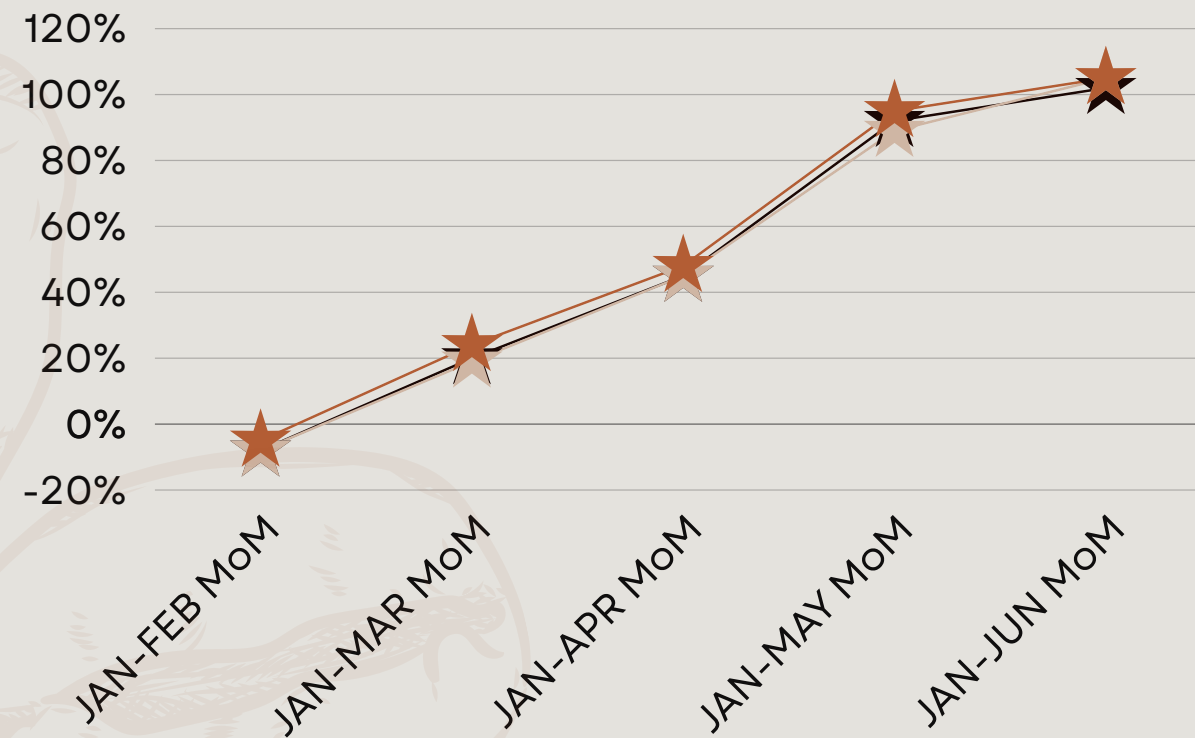

Location sales per Daylight category

- The graph above offers insights into the busiest and quietest periods for each location throughout the day.
- Among the three locations, only Hell's Kitchen demonstrates consistent sales across the entire day.
- Lower Manhattan shows a particularly low evening output of just 18%, making it the weakest performer during any time of day among the three locations.
- As mentioned earlier, several factors could contribute to this issue, such as its positioning in a business district that becomes quiet in the evenings or its proximity to a less secure area.
- Possible **solutions** may include introducing **delivery services**, **launching promotions during off-peak hours**, **revamping the menu to better suit the local market during off-peak hours**, or **reassessing evening trading hours**.

Growth Patterns

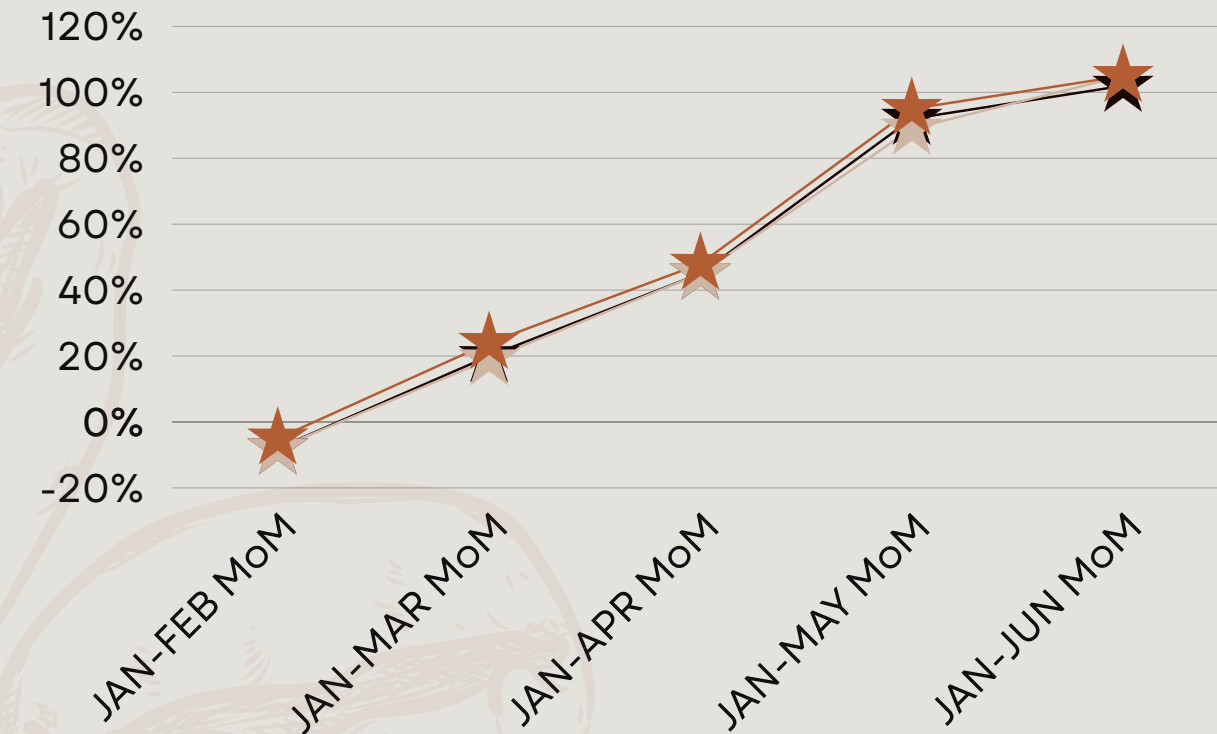

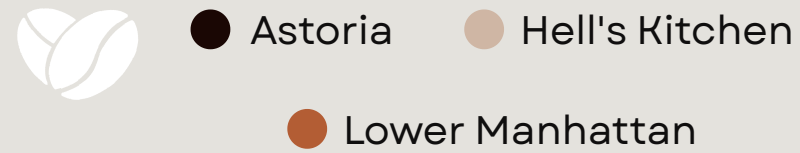

● Astoria ● Hell's Kitchen
● Lower Manhattan

Year to date growth %

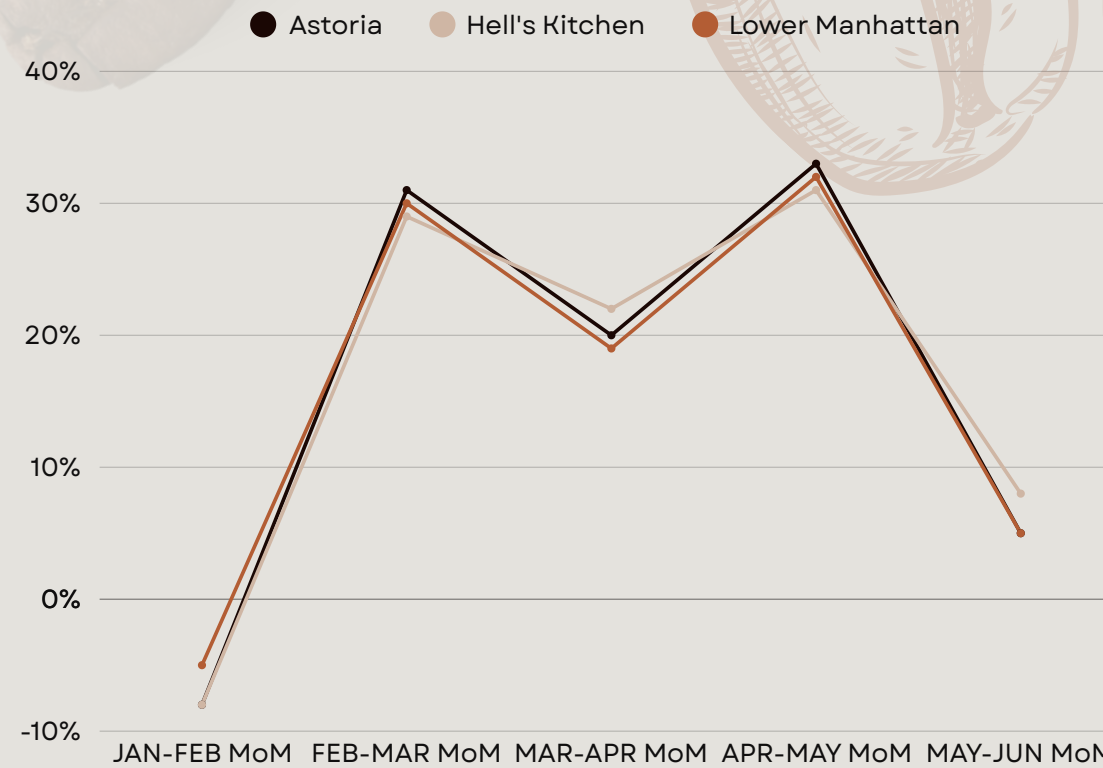

- The coffee shops have experienced growth of over 100% in 6 months from Jan 2023.
- This growth could be attributed to several factors, including weather conditions, market expansion, and the timing of new product launches.

Growth Patterns

Year to date growth %

- The coffee shops have experienced growth of over 100% in 6 months from Jan 2023
- This growth could be attributed to several factors, including weather conditions, market expansion, and the timing of new product launches.

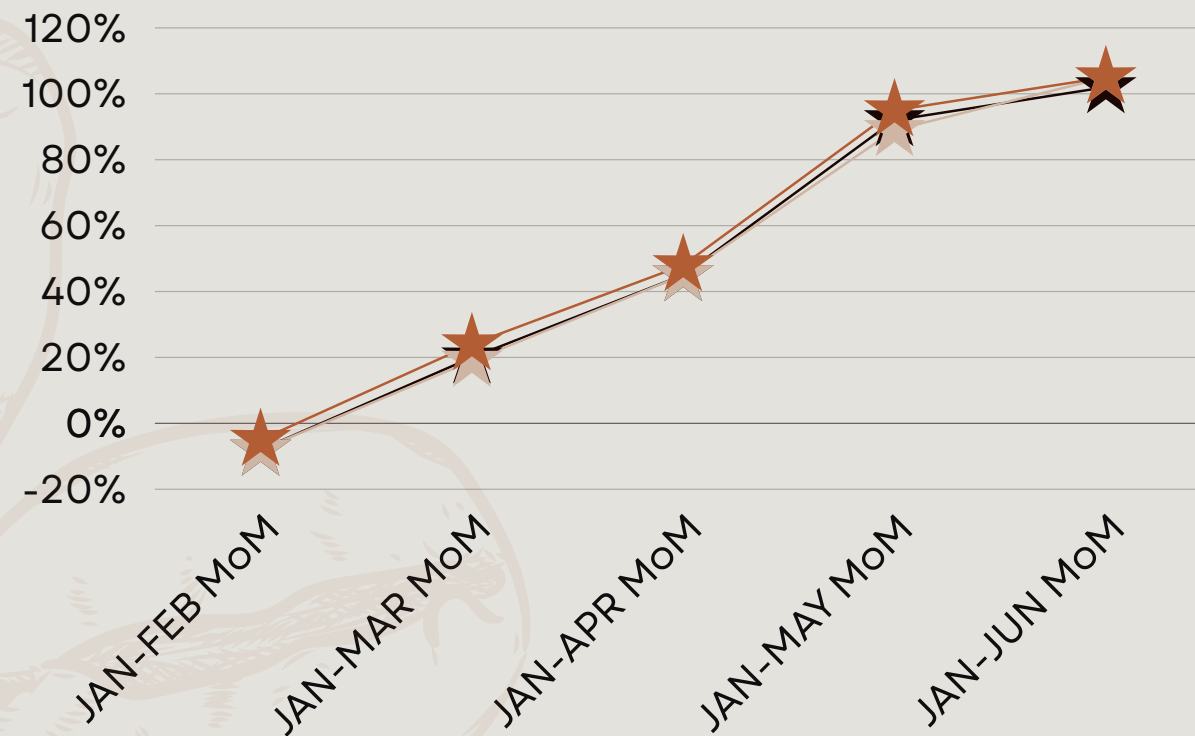

Month on Month (MOM) growth %

- The typical growth target for coffee shops comparable to ours is approximately 5% per month.
- Our coffee shop has achieved month-to-month growth rates reaching as high as 33%, significantly surpassing market expectations.

Aggregate Monthly Growth

- It's crucial to highlight that **weather conditions may have significantly influenced the sales patterns.**
- In Manhattan and Astoria, winter typically lasts from December to February.
- This indicates that these areas had shorter daylight hours compared to the subsequent five months.

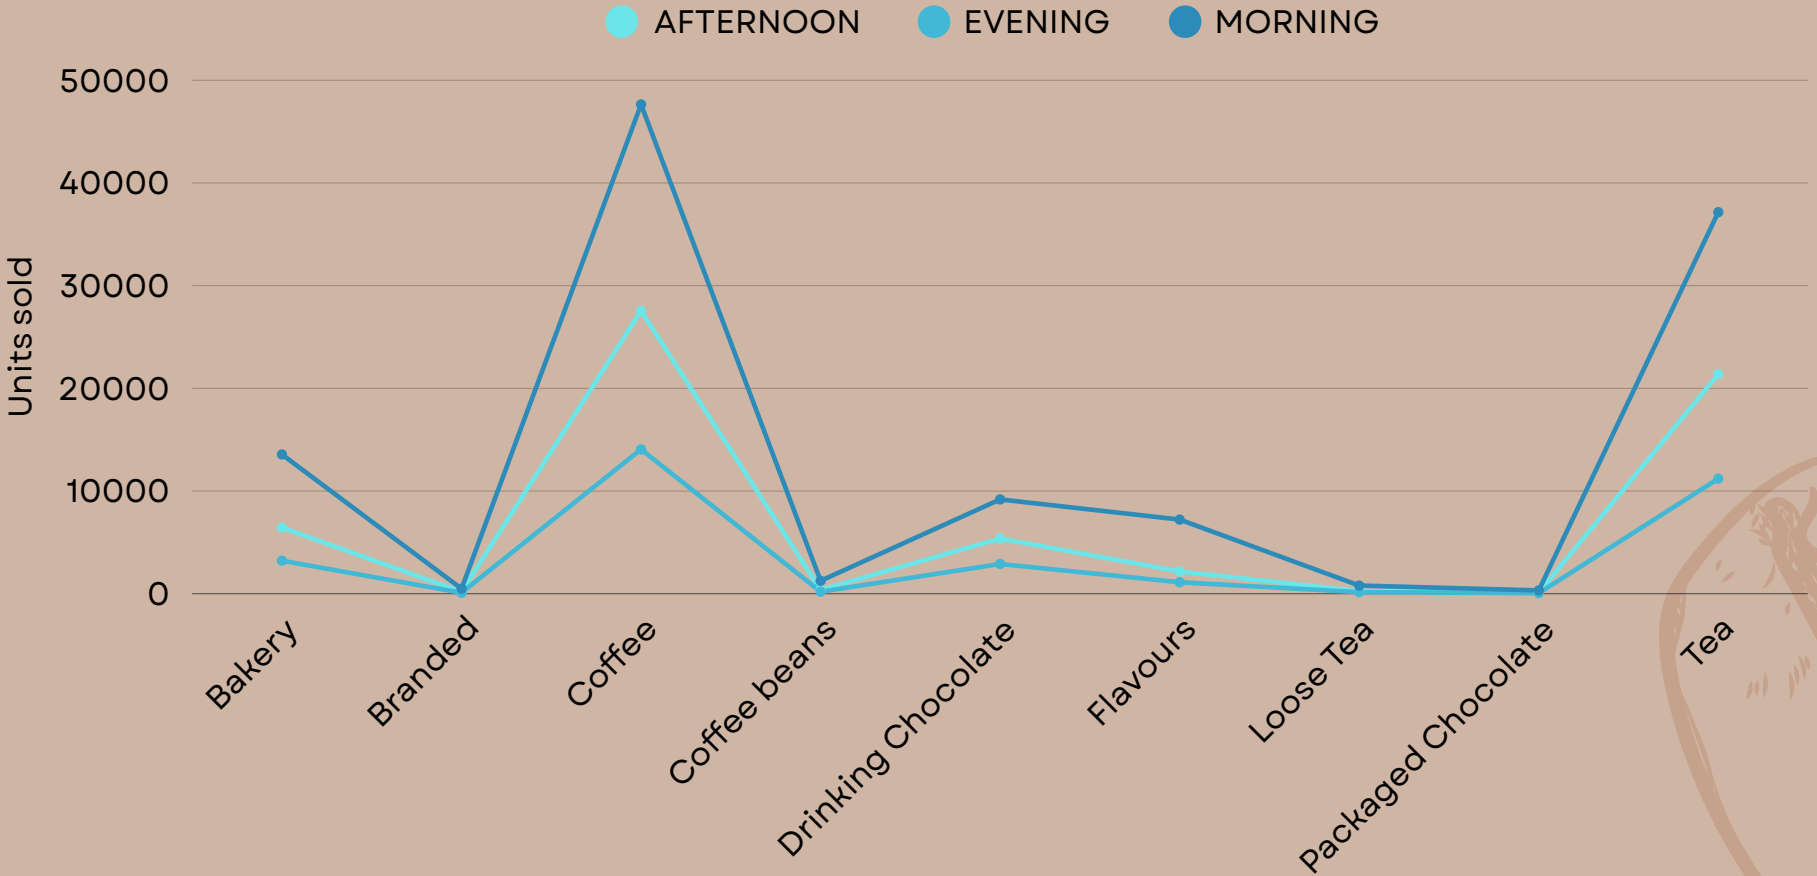

Product Categories

Per Location

- Our top-selling categories are Coffee, with Tea following closely behind and the bakery category taking the third spot.
- Conversely, our lowest-selling categories include coffee beans, loose tea, branded items, and packaged chocolates.
- However, there's no need for concern, as these products appear to serve as inputs for our main offerings.

Per Daylight hours

- Our key offerings—coffee, tea, and baked goods—consistently rank as top sellers, no matter the hour.
- However, coffee shops shouldn't be disheartened by lower sales in other categories, as their main role is to support the sales of tea and coffee.
- It might be beneficial for the coffee shop to consider running promotions on these products.
- Additionally, the coffee shop could explore the option of commercializing these input products, similar to Nando's approach with their sauce.

THANK
YOU.
